

\$BERB

YELLOW  
POOPER

## A. Introduction

BERB Token (\$BERB) was created because the Injective ecosystem is full of based & serious projects. To balance things out, The Injective ecosystem is in dire need of a shitty, low-quality, and worthless project. That's where we came in to fill what's missing in the ecosystem.

\$BERB is the original memecoin of Injective. We bring absolutely nothing other than a yellow canary bobbing its head up and down on the discord chat. \$BERB won't make you rich, as \$BERB is pegged to zero.

## B. Utility

Read the Introduction again you turds!

## C. Wen

\$BERB will be launched on the first day of Mito Launchpad available on the Injective Mainnet. We don't have a date yet but it should be this year (Q4 2023).

## D. Why Berb?

The canary bird is chosen as the icon for \$BERB because back in 2021, Eric Chen the Co-Founder of Injective posted a canary bird picture teasing a canary chain launch, thus masking the Canary Bird as the perfect animal to be the leader of Injective's memecoin ecosystem.

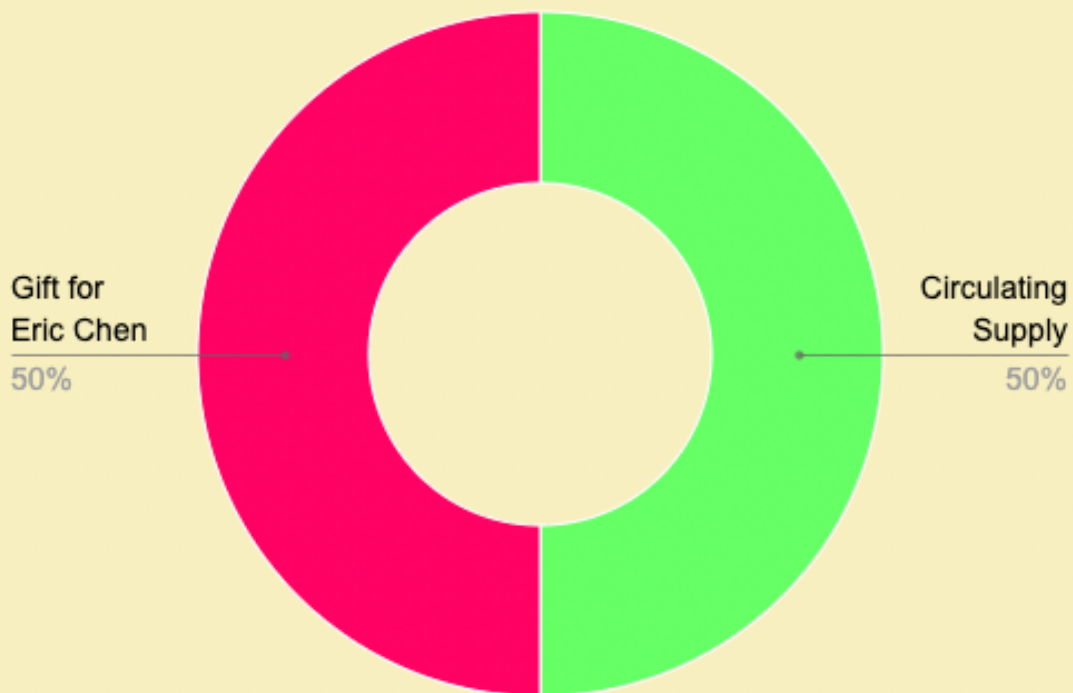

## E. Berbonomics

In this section, you can find the token distribution of \$BERB. Keep in mind the distribution is 100% rigged for the founders so we can get rich from \$BERB, leaving all of you behind to get rugged.

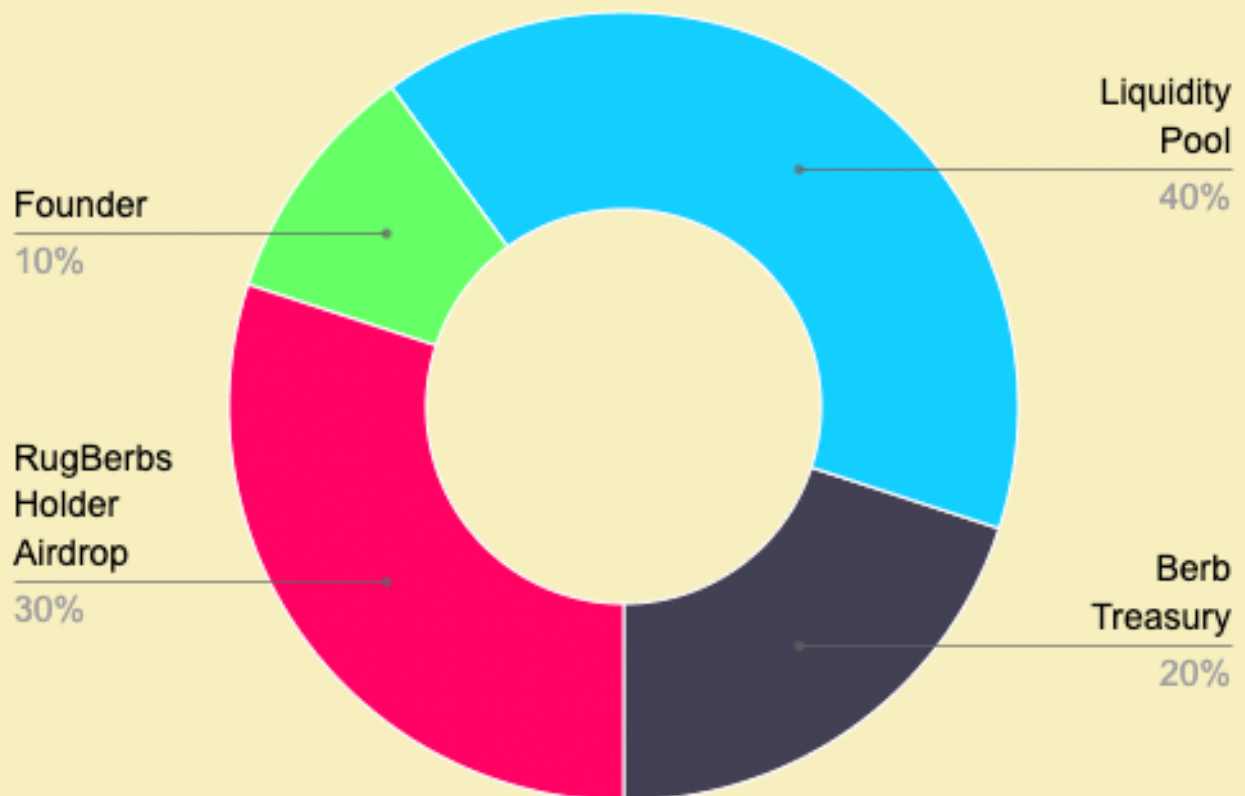

Supply:

690,000,000,000,000

50% of the supply will be sent to Eric Chen's wallet. We don't know what will happen to those tokens but we believe Eric wouldn't have any ill intention with the tokens and will put it for good use.

Circulating Supply:  
345,000,000,000,000

The distribution of the rest of the supply will be as following:

### **RugBerbs Holder Airdrop**

30% of the circulating supply will be airdropped to the turds who held our RugBerbs NFT collection as a reward for their stupidity to hold a worthless GIF.

### **Berb Treasury**

20% of the circulating supply will be kept in the treasury wallet for various purposes such as

community event, Liquidity wallet for the Diplos coin flip, etc.)

### **Liquidity Pool**

40% of the circulating supply will be utilized to add the LP on various DEX on Injective (Helix, Astroport, etc.)

### **Founders**

10% of the circulating supply will be sent to the founder's wallet so we can dump it on your face if you are trying to depeg \$BERB from zero.
